Thank you, Gary. I'll forward you the draft demolition application for your review and approval tomorrow.

Regards,

Don

Hi Gary,

Because the asbestos present is category 1 non-friable roofing you can use standard contractor and can dispose of as general waste. During roof removal I would follow general safe practices for dust suppression and worker safety. I would also let the contractor and landfill know there is some non-regulated asbestos roofing sealant present. We can have a call if you would like to go over in more detail.

Hey Lee,

Based upon your report, do we need an asbestos certified contractor to remove the metal roof from the building?

Also, will the roof need to be disposed as asbestos debris?

How should this happen?

Thanks
Gary Moore
